

LETTER OF SUPPORT

More than 1.8 million Alabamians, including nearly half a million children, live in communities with limited access to healthy food. A Healthy Food Financing Initiative (HFFI) is one policy solution that has proven to reduce diet-related illnesses, create jobs and boost the economy.

I support VOICES for Alabama's Children in advocating for implementation of a statewide HFFI to incentivize grocers and other healthy food retailers to locate in communities with limited access.
