OUR MISSION

To speak for the well-being of **Alabama's children** through research, public awareness, and advocacy.

ABOUT VOICES FOR ALABAMA'S CHILDREN AND ALABAMA KIDS COUNT

VOICES for Alabama's Children, founded in 1992, is a 501(c) (3) statewide nonpartisan organization whose mission is to speak for the well-being of Alabama's children through research, public awareness, and advocacy. *Alabama Kids Count* is a project of VOICES for Alabama's Children and the Annie E. Casey Foundation. Our annual research publication, the *Alabama Kids Count Data Book*, is the most trusted source of research on child well-being for all 67 counties in Alabama. For more than 25 years, the *Data Book* has served as both a benchmark and roadmap for how children are faring and is used to raise visibility of children's issues, identify areas of need, set priorities in child well-being and inform decision-making at the state and local levels.

Foreword

Stephen Woerner, VOICES for Alabama's Children Executive Director

For twenty nine years, VOICES for Alabama's Children has worked to advocate for the issues facing Alabama's children. This marks our 27th edition of the *Alabama Kids Count Data Book*, the gold standard for data about the health, education, safety, and economic security of our kids. Never, in the nearly 30 years VOICES has been in existence, did we expect to face the kinds of challenges that 2020 has brought to bear on our state. The COVID-19 pandemic has created challenges for Alabama's children and families in almost every metric tracked in this book, from child abuse and neglect, to educational attainment, to food security, or child care access, and beyond. Decision makers at every level are faced with crises that have not been seen in any of our lifetimes. More than ever, VOICES believes that better data informs better decisions.

It is important to note that virtually none of the data captured in this book reflects our current circumstances. All of the data sets that we received from our state agency partners predate the beginning of the pandemic in mid-March 2020. Rather, this book should be used as a benchmark of where

we were before the pandemic began. In the coming months, as Alabama, America, and the world navigate beyond this current crisis, we will need this data to understand where we have regressed in regards to the conditions of our children, and where we are to work towards.

As advocates, decision makers, and community leaders, we need to take a hard look at the circumstances prior to COVID-19. As Dr. Scott Harris, Alabama Department of Public Health State Health Officer has said numerous times throughout this year, "COVID-19 has not created any inequities, it has simply exposed those that already existed." The racial, geographic and economic disparities in the impact of this pandemic are clear and undeniable. However, they are also not new. Access to healthcare, access to broadband, access to healthy food, access to high quality affordable child care, these are all issues that existed prior to the pandemic, but have only been highlighted or exacerbated as a result. More than ever, the need to examine the public policies and funding priorities that have created these circumstances, and intentionally addressing them is crucial for the well-being of Alabama's children and families.

As Winston Churchill is believed to have said "never let a good crisis go to waste" and this is the time to use good data to re-envision what our health care system, our education system, our child care system, or our food systems could look like. The needs are real, the crisis is present, but the opportunity is very much here to pull together as Alabamians to work for the "Alabama solutions to Alabama problems." Here at VOICES, we strongly encourage you to dig into this data. Identify the issues facing your communities. Pull together and work for solutions that will help improve the circumstances for every one of our children. Alabama is facing unprecedented challenges, but Alabama has also never been stronger.

Yours in Advocacy,

Stephen Woerner, Executive Director

The ncredible Journey

20 YEARS OF SERVICE

Rhonda Mann, Deputy Director of VOICES/ Alabama Kids Count Director

I joined VOICES for Alabama's Children in July 2000 and, in 2010, my duties expanded to include overseeing the Alabama Kids Count Data Project. As Alabama Kids Count Director, I've worked to expand the data and help others understand the importance of disaggregation of data by race/ ethnicity, income, gender, and zip code that shows gaps in outcomes and achievement. Our child-serving state agencies became partners in this Project and continue to provide valuable insight on children's issues. The end result is a document that provides the most comprehensive view of where the well-being of Alabama's children has improved over time and where it has not.

The 2020 Alabama Kids Count Data Book is not exactly how I envisioned Thank you for your trust in me and for the opportunity to make a difference in the lives of Alabama's children.

my final *Data Book* would go. This year's report was supposed to focus on projecting what child well-being trends would continue unless steps were taken to intervene. Like so much else in our day-to-day lives, 2020 and the coronavirus had different plans for us in mind. Still, this year's *Alabama Kids Count Data Book* is probably one of the most critical snapshots of child well-being that we have released in VOICES' 28year history.

I am proud to have played a role in presenting this data to policymakers and others so that Alabama could zero-in on needed policy changes, new programs, and funding appropriations to help Alabama's children get more of what they need to thrive. From child passenger safety to graduated teen drivers' licensing, increased funding of Alabama's First Class Pre-K to child care licensing and oversight, I know that Alabama is a better place for children today because of VOICES and our Kids Count work.

July 2020 marked my 20th year at VOICES. I came to VOICES from a business background but quickly found a passion for our work to improve the well-being of Alabama's children. Throughout my time here, I have had the opportunity and privilege to meet and work with so many child advocates, state agency staff, lawmakers, Governor's staff and advisors, VOICES board members and staff, media, and others. Although October 31, 2020, was my last day with the organization, regardless of where retirement takes me, I will continue to speak for those who cannot speak for themselves. Thank you for your trust in me and for the opportunity to make a difference in the lives of Alabama's children.

Introduction

The majority of the data presented in the 2020 Alabama Kids Count Data Book compares 2008 data to 2018-2019 data. As a result, this year's report is providing a critically important benchmark for how our children were faring when COVID-19 hit.

Due to the amount of time it requires to collect, analyze, and trend the data, there is a lag that can be as long as 18 months in data that is published as "current year". This year the lag in data is advantageous because the COVID-19 pandemic does not skew what the book is trying to tell us. Instead, our analysis provides a clear glimpse of how our children were faring before the outbreak. Readers should view this year's Alabama Kids Count Data Book as a critical baseline that future data books will measure against to truly understand the full impact coronavirus had on the health, education, safety, and economic security of Alabama's children and families.

We proceeded with this year's report with this risk in mind knowing it will take a few years for us to see the full impact this health crisis has had on child well-being in 2020 and beyond. We believe that by better understanding what the data is telling us about our children before COVID, it will help us more adequately measure progress on the state's recovery.

What readers should take away from this approach is the pandemic did not cause the inequities in child well-being but it exposed cracks hiding in our system. The 2020 Alabama Kids Count Data Book clearly shows many of these disparities have existed for years. Readers will also notice that we have intentionally left off the narratives and graphics from this year's data book. We hope that this does not cause you any difficulties.

The following data highlights summarize the top-level findings included in the 2020 Alabama Kids Count Data Book. We encourage you to read the definitions that follow each data set in each domain to have a clear understanding of what the data represents. As always, if you have questions, please contact VOICES.

DEMOGRAPHICS

- Demographic data on the makeup of our population continues to reflect previous trends. The total population in 2019 compared to 2000 grew by just over 10 percent or 456,085 people while the child population decreased by 3 percent or 39,722 children.
- These changes in population will result in an aging population and will put a heavier burden on a smaller pool of workers to fill vacant jobs and care for a larger retired population.
- The makeup of the child population continues to show children of color will soon be the majority of the child population and the majority of the work force by 2030.

HEALTH

- In 2018, infant mortality improved to a rate of 7.0 per 1,000 live births compared to 2008 rate of 9.5 per 1,000 live births.
- In 2018, births to females aged 15-17 and births to all females aged 10-19 showed significant improvement compared to rates for 2008.

- In 2018, 69 percent of mothers chose to breastfeed their child at birth.
- Alabama's average ratio of mental health providers to the population is 988 to 1.
- In 2019, 33,118 children received mental health services for a Serious Emotional Disturbance (SED).

EDUCATION

- Children born to mothers with less than 12 years of education are more likely to not participate in a quality early learning program. In 2018, Alabama saw this indicator improve to 13.9 percent which is down compared to a rate of 22.3 percent in 2008.
- In FY2019, 7,471 children Birth to 3 years of age benefitted from early intervention services which was up from 5,837 children in FY2009. Early intervention provides services to children with developmental delays and children with diagnoses that increase the risk for developmental delays (e.g. cerebral palsy, spina bifida, etc.).
- In the 2020-2021 school year, 22,410 or 38.2 percent of four year olds participated in Alabama's First Class Pre-K Program. Alabama received a number one quality rating for 13 years in a row and is one of only three states, along with Michigan and Rhode Island, to meet or exceed all ten of the research-based benchmarks that the independent National Institute for Early Education Research measures to determine a program's quality.
- Reading on grade level by end of third grade is a major milestone for all children as they move from "learning to read" to "reading to learn." In 2018-2019 school year, only 48.2 percent of fourth

graders were reading proficiently. During that same school year, 45.1 percent of eighth graders were reading proficiently.

- Fourth graders proficient in Math in the 2018-2019 school year were 48.5 percent. Eighth graders, during that same school year, had a rate of 48.1 percent proficiency in math.
- Gaps in educational achievement for Fourth Grade and Eighth Grade reading and math are 26 to 29 percentage points lower for children in poverty compared to children above poverty.
- Alabama's graduation rate for 2018-2019 school year was 92.9 percent up from 91 percent in 2017-2018 school year.
- The College and Career Ready Index reports students who meet at least one of the seven benchmarks that make-up the Index and reflects a student's potential to succeed at higher education and/or a career after high school graduation. In 2018-2019, 80.3 percent of public school students met at least one criteria.
- There is a huge disparity in students who are suspended when it is disaggregated by race/ethnicity. In the 2018-2019 school year, black students were suspended at a rate of 19 percent which is twice as high as all other races at a rate of 9.9 percent or less.
- In 2018-2019 school year, 6.4 percent of public school teachers were teaching out of field compared to 4.9 percent of teachers in the 2014-2015 school year.

SAFETY

• Alabama children with an indication of abuse or neglect

increased to a rate of 11.1 per 1,000 in FY 2019 compared to a rate of 5.1 per 1,000 in 2008.

- The child death rate which is the number of deaths from all causes to children 1-14 years of age was 21.7 per 100,000 in 2018. This was slightly lower compared to 23.0 per 100,000 in 2008.
- The number of children in foster care in 2020 was 6,324 which was a 14.3 percent increase compared to 5,534 children in foster care in 2012.
- More than 10,000 children are in protective services meaning they are in the custody of their family or primary caretaker and receiving services to the family unit to maintain the safety, stability, and child well-being.
- The Juvenile Violent Crime Court Petition Rate in 2019 was 4.4 per 1,000 youth 10 to 17 years of age. This rate has improved and is less than half the rate in 2009 of 9.6 per 1,000.

ECONOMIC SECURITY

- The total rate of poverty for Alabama in 2014-2018 averaged 17.5 percent compared to 16.1 percent in 2000.
- Children in poverty had an average rate from 2014-2018 of 25.1 percent which is up from a rate of 21.5 percent in 2000.
- Of all age ranges, children under five have the highest rate of poverty at 28.4 percent.
- The unemployment rate in 2019 was 3 percent compared to 5.7 percent in 2008.
- Single parent families have increased 7.7 percentage points with a five year average rate

of 37.3 percent in 2014-2018 compared to 29.6 percent in 2000.

- Employed mothers with young children (children under age 6) was 56.6 percent in 2000 compared to a five year average rate of 62.5 percent during 2014-2018.
- When dollars are adjusted for inflation, the median household income increased by \$213 in 2018 compared to 2008.
- Medicaid paid births continue to hover just under 50 percent of all births in Alabama.
- The average monthly case load for mothers participating in the Women, Infant and Children (WIC) federal nutrition program in FY2019 was 115,448.
- In 2020, 638,176 people received Supplemental Nutrition Assistance Program (SNAP) benefits which was a decrease of 23.3 percent compared to 832,238 SNAP recipients in 2015.
- Food insecurity refers to a lack of access, at times, to enough food for an active, healthy life for all household members and limited or uncertain availability of nutritionally adequate foods. In 2018, Food Insecurity for Alabama children under 18 was 23.1 percent and 17 percent for all ages.

National KIDS COUNT® Methodology

METHODOLOGY

NATIONAL KIDS COUNT METHODOLOGY

DOMAIN RANK for each state was determined in the following manner. First, the Foundation converted the state numerical values for the most recent year for each of the four key indicators within every domain into standard scores. It summed those standard scores in each domain to get a total standard score for each state. Finally, Casey ranked the states based on their total standard score by domain in sequential order from highest/best (1) to lowest/worst (50). Standard scores were derived by subtracting the mean score from the observed score and dividing the amount by the standard deviation for that distribution of scores. All measures were given the same weight in calculating the domain standard score.

OVERALL RANK for each state was calculated in the following manner. First, Casey converted the state numerical values for the most recent year for all 16 key indicators into standard scores. It summed those standard scores within their domains to create a domain standard score for each state. The Foundation then summed the four domain standard scores to get a total standard score for every state. Finally, it ranked the states based on their total standard scores in sequential order from highest/best (1) to lowest/worst (50). Standard scores were derived by subtracting the mean score from the observed score and dividing the amount by the standard deviation for that distribution of scores. All measures were given the same weight in calculating the total standard score.

PERCENTAGE CHANGE OVER TIME ANALYSIS was computed by comparing the most recent year's data for the 16 key indicators with the data for the base year. To calculate percentage change, the Foundation subtracted the rate for the most recent year from the rate for the base year and then divided that quantity by the rate for the base year. The results are multiplied by 100 for readability. The percentage change was calculated on rounded data, and the percentage-change figure has been rounded to the nearest whole number.

National KIDS COUNT[®] Definitions & Sources

DEFINITIONS

ECONOMIC WELL-BEING INDICATORS

CHILDREN IN POVERTY is the percentage of children under age 18 who live in families with incomes below 100% of the U.S. poverty threshold, as defined each year by the U.S. Census Bureau. In 2018. a family of two adults and two children lived in poverty if their annual income fell below \$25,465. Poverty status is not determined for people living in group quarters (such as military barracks, prisons and other institutional quarters) or for unrelated individuals under age 15 (such as children in foster care). The data are based on income received in the 12 months prior to the survey.

SOURCE: U.S. Census Bureau, American Community Survey.

CHILDREN WHOSE PARENTS LACK SECURE EMPLOYMENT

is the share of all children under age 18 living in families where no parent has regular, full-time, yearround employment. For children living in single-parent families, this means the resident parent did not work at least 35 hours per week for at least 50 weeks in the 12 months prior to the survey. For children living in married-couple families, this means neither parent worked at least 35 hours per week for at least 50 weeks in the 12 months before the survey. Children living with neither parent are also listed as not having secure parental employment because they are likely to be economically vulnerable.

SOURCE: U.S. Census Bureau, American Community Survey.

CHILDREN LIVING IN HOUSEHOLDS WITH A HIGH HOUSING COST BURDEN is the

percentage of children under age 18 who live in households where more than 30% of monthly household pretax income is spent on housingrelated expenses, including rent, mortgage payments, taxes and insurance.

SOURCE: U.S. Census Bureau, American Community Survey.

TEENS NOT IN SCHOOL AND NOT

WORKING is the percentage of teenagers between ages 16 and 19 who are not enrolled in school (full or part time) and not employed (full or part time).

SOURCE: U.S. Census Bureau, American Community Survey.

EDUCATION INDICATORS YOUNG CHILDREN NOT IN

SCHOOL is the percentage of children ages 3 and 4 who were not enrolled in school (e.g., nursery school, preschool or kindergarten) during the previous three months. Due to small sample size, these data are based on a pooled threeyear average of one-year American Community Survey responses to increase the accuracy of the estimates.

SOURCE: U.S. Census Bureau, American Community Survey.

FOURTH-GRADERS NOT PROFICIENT IN READING is the

percentage of fourth-grade public school students who did not reach the proficient level in reading as measured by the National Assessment of Educational Progress. For this indicator, public schools include charter schools and exclude Bureau of Indian Education and Department of Defense Education Activity schools.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress.

EIGHTH-GRADERS NOT PROFICIENT IN MATH is the

percentage of eighth-grade public school students who did not reach the proficient level in math as measured by the National Assessment of Educational Progress. For this indicator, public schools include charter schools and exclude Bureau of Indian Education and Department of Defense Education Activity schools.

SOURCE: U.S. Department of Education, National Center for Education Statistics, National Assessment of Educational Progress.

HIGH SCHOOL STUDENTS NOT GRADUATING ON TIME

is the percentage of an entering freshman class not graduating in four years. The measure is derived from the adjusted cohort graduation rate (ACGR). The four-year ACGR is the number of students who graduate in four years with a regular high school diploma divided by the number of students who form the adjusted cohort for the graduating class. Students entering ninth grade for the first time form a cohort that is adjusted by adding any students who subsequently transfer into the cohort and subtracting any students who subsequently transfer out.

SOURCE: U.S. Department of Education, National Center for Education Statistics, Common Core of Data.

HEALTH INDICATORS

LOW BIRTH-WEIGHT BABIES

is the percentage of live births weighing less than 5.5 pounds (2,500 grams). The data reflect the mother's place of residence, not the place where the birth occurred.

SOURCE: Centers for Disease Control and Prevention, National Center for Health Statistics, Vital Statistics.

CHILDREN WITHOUT HEALTH

INSURANCE is the percentage of children under age 19 not covered by any health insurance. The data are based on health insurance coverage at the time of the survey; interviews are conducted throughout the calendar year.

SOURCE: U.S. Census Bureau, American Community Survey.

CHILD AND TEEN DEATHS PER

100,000 is the number of deaths, from all causes, to children between ages 1 and 19 per 100,000 children in this age range. The data are reported by the place of residence, not the place where the death occurred.

SOURCES: Death Statistics: Centers for Disease Control and Prevention, National Center for Health Statistics, Vital Statistics. Population Statistics: U.S. Census Bureau, Population Estimates.

CHILDREN AND TEENS WHO ARE OVERWEIGHT OR OBESE is the

percentage of children and teens ages 10 to 17 with a Body Mass Index (BMI)-for-age at or above the 85th percentile. These data are based on a two-year average of survey responses.

SOURCE: U.S. Department of Health and Human Services, Health Resources and Services Administration, Maternal and Child Health Bureau, National Survey of Children's Health.

FAMILY AND COMMUNITY INDICATORS

CHILDREN IN SINGLE-PARENT

FAMILIES is the percentage of children under age 18 who live with their own unmarried parents. Children not living with a parent are excluded. In this definition, single-parent families include cohabiting couples. Children living with married stepparents are not considered to be in a single-parent family.

SOURCE: U.S. Census Bureau, American Community Survey.

CHILDREN IN FAMILIES WHERE THE HOUSEHOLD HEAD LACKS A HIGH SCHOOL DIPLOMA is the

percentage of children under age 18 living in households where the household head does not have a high school diploma or equivalent.

SOURCE: U.S. Census Bureau, American Community Survey.

CHILDREN LIVING IN HIGH-

POVERTY AREAS is the percentage of children under age 18 who live in census tracts where the poverty rates of the total population are 30% or more. In 2018, a family of two adults and two children lived in poverty if their annual income fell below \$25,465. The data are based on income received in the 12 months prior to the survey. The census tract data used in this analysis are only available in the five-year American Community Survey.

SOURCE: U.S. Census Bureau, American Community Survey.

TEEN BIRTHS PER 1,000 is the number of births to teenagers between ages 15 and 19 per 1,000 females in this age group. Data reflect the mother's place of residence, rather than the place of the birth.

SOURCES: Birth Statistics: Centers for Disease Control and Prevention, National Center for Health Statistics, Vital Statistics. Population Statistics: U.S. Census Bureau, Population Estimates.

SNAPSHOT OF ALABAMA'S CHILD WELL-BEING

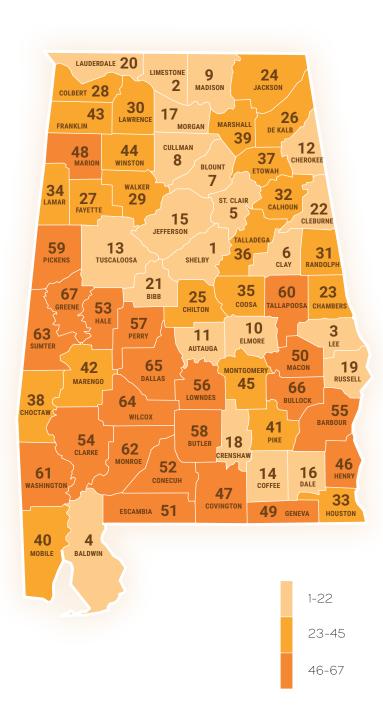

This Snapshot of Alabama's child well-being gives a balanced overall picture of the state.

With 9 indicators from Low Birth Weight to Reading Proficiency to Children in Poverty, the Snapshot is a strong benchmark to examine child well-being.

2020 Overall County Rankings

Overall county rankings are based on a scale containing nine indicators (see page 14).

Exploring the Data... How to Use This Book

DEFINITIONS

Data reported in the 2020 Alabama Kids Count Data Book are organized into four areas of child well-being: Health, Education, Safety and Economic Security.

The Data Book presents basic indicators of child well-being, including percentages and rates for the base and current years. Complete county and state data profile reports are available online at http:// www.alavoices.org/ alabama_kids_count.

BASE AND CURRENT YEARS

To reflect how each indicator has changed over time, most indicators include a base year and the most recent available year. Due to delays in data collection and reporting, base and current year data may vary for different indicators.

The Alabama Kids Count Data Book uses the most current data available at the time of preparation for publication. Where possible, VOICES for Alabama's Children uses a minimum 10-year time span between base year and current year data.

TREND ANALYSIS

For a number of indicators, VOICES for Alabama's Children indicates whether the measure shows improvement over time (I) or is worsening over time (W). Trends are indicated only when they are statistically significant, typically over a 10-year period. Trend data are not reported for all indicators due to the lack of sufficient data or other considerations.

COUNTY RANKS AND RANKINGS

For many of the individual indicators, rankings are provided for all of Alabama's 67 counties. A rank of "1" indicates the best performance on a given indicator, and a rank of "67" indicates the worst.

Numbers, rates and percentages for most indicators are presented for a single year.

COMPOSITE COUNTY RANKINGS

Overall county rankings are shown on **page 14.** The county ranking for each year is based on a group of indicators that are highly correlated and meet other selected criteria. The overall county rankings are not based on a composite of all indicators that are reported for a particular county.

The indicators used to determine the overall county rank are: lowweight births, births to teens aged 15-17, children in poverty, fourth grade students scoring at Levels 3 and 4 in reading on the Scantron ACT test, children participating in first class Pre-K, teens not attending school and not working, child food insecurity, Medicaid paid births and the unemployment rate. Because the indicators that reflect overall child well-being may vary from year-to-year, comparisons between one year's overall ranking and that of a previous year should be made only with caution.

VOICES for Alabama's Children encourages users to focus on individual indicators to identify areas of child well-being in each county that need the greatest attention and to track positive changes made in areas where programs have been implemented to promote improvement. See **page 63** of this book for information on the methodology used to determine the county rankings.

NUMBERS, PERCENTAGES AND RATES

Although it is important to know the number of events occurring within a specific location, numbers alone are not enough to make meaningful comparisons due to major differences between counties. "Raw numbers" represent the number of cases reported that have not been "processed" or converted into percentages or rates. Raw numbers are converted into percentages and rates to make comparisons more meaningful (or to "standardize" them) from one county (or group) to another.

To compute percentages and rates, we divide the raw numbers for a selected indicator by a given "base". Depending on our indicator, the base could be the total female population aged 15-17 as in "percent of total births to teens aged 15-17," first-grade enrollment for the "first grade retention rate," the number of children aged 1-14 for the "child death rate" and so on. We then multiply the result by 100, 1,000, or 100,000 to avoid working with numbers that are often exceedingly small. When we multiply by 100, we generally call the result a "percent," although the term "rate" is sometimes used as well. When we multiply by 1,000 or 100,000, we label the result a "rate."

A "percent" is really a "rate," in that it represents the number of cases reported to us per 100 units of the base we have used.

LIST OF INDICATORS FOR THE 2020 DATA BOOK

DEMOGRAPHICS

- Child Population (Under 20)
- Child Population by Age Range
- Children as a Percentage
 of County Population
- Diversity of Alabama's Child Population
- Pre-School Aged Children (Age 3)
- Pre-School Aged Children (Age 4)
- Total Population

HEALTH

- Adult Diabetes
- Adult Obesity
- Births to Females, Aged 10-19
- Births to Teens, Aged 15-17Births to Unmarried
- Females, Aged 10-19Children with SED
- Receiving MH Services
- Children Without
 Health Insurance
- Diet-Related Deaths
- Females Receiving Adequate/ Adequate-Plus Prenatal Care
- Infant Mortality, All Races
- Low Birth Weight, All Races
- Mothers Who Breastfed
- Mothers Who Smoked
- Poor Mental Health Days
- Pre-term Births to All Mothers

• Ratio of Mental Health Providers to Population

EDUCATION

- Age 0-3 Receiving Early
 Intervention Services
- Average 11th Grade ACT ScoresBirths to Females with Less
- Than 12 Years of Education
- Child Care Centers Capacities
- Child Care Facilities
- Children Participating in First Class Pre-K
- Chronic Absenteeism (10-17 Days)
- Chronic Absenteeism (18+Days)
- College and Career Ready Index
- Direct Certification
- Early Head Start and Head Start Classrooms
- English Language Learners
- Expulsions by Gender
- First Class Pre-K Classrooms by Delivery Type
- First Grade Retention
- Graduation Rate
- High School Dropout Rate
- Homeless Students
- Ninth Grade Retention
- Per Pupil Expenditures
- Scantron Eighth Grade Math
- Scantron Eighth Grade Reading
- Scantron Fourth Grade Math
- Scantron Fourth Grade Reading
- Suspensions by Gender
- Suspensions by Race
- Teachers Teaching Out of Field

SAFETY

- Child Death Rate
- Children Adopted
- Children in Foster Care
- Children in Protective Services
- Children with an Indication
 of Abuse or Neglect
- Independent Living Program (ILP) Ages 14 and Older
- Juvenile Violent Crime
 Court Petition Rate
- Preventable Teen Death Rate
- Teens Not Attending School/Not Working

• Youth Incarcerations Before and After Juvenile Justice Act

ECONOMIC SECURITY

- Child Care Subsidies
- Children in Extreme Poverty
- Children in Poverty
- Children in Poverty, by Age Range
- Children under 18 in Single-Parent Families
- Employed Mothers with Young Children
- Food Insecurity, All Ages
- Food Insecurity, Children Under 18
- Median Household Income
- Medicaid Paid Births
- Persons in Poverty
- SNAP Eligible, Ages 0-20
- SNAP Eligible, All Ages
- SNAP Recipients
- Unemployment Rate
- Vulnerable Families
- WIC Average Monthly Case Load

Please note: Population sub-groups are listed and referred to the way the agency or organization providing the data references the sub-groups. Though you will see varying nomenclature used, the way we refer to population sub-groups throughout the 2020 Alabama Kids Count Data Book is intentional in order to be as accurate as possible in representing the data.

Demographics Definitions & Sources

DEFINITIONS

POPULATION

Population is defined as all people, male and female, child and adult, living in a given geographic area.

Unless otherwise noted, this *Data Book* defines a child as a person under 20 years of age.

U.S. Census Bureau, Population Division, CC-EST2009-ALLDATA-[ST-FIPS]: Annual County Resident Population Estimates by Age, Sex, Race, and Hispanic Origin: April 1, 2000 to July 1, 2009.

U.S. Census Bureau, Population Division, CC-EST2019-ALLDATA-[ST-FIPS]: Annual County Resident Population Estimates by Age, Sex, Race, and Hispanic Origin: April 1, 2010 to July 1, 2019.

U.S. Census Bureau, Population Division, Annual County and Resident Population Estimates by Selected Age Groups and Sex: April 1, 2010 to July 1, 2019 (CC-EST2019-AGESEX).

U.S. Census Bureau, Population Division, Table B01001: SEX BY AGE. 2014-2018 American Community Survey 5-Year Estimates

U.S. Census Bureau, Population Division, CC-EST2008-ALLDATA-[ST-FIPS]: Annual County Resident Population Estimates by Age, Sex, Race, and Hispanic Origin: April 1, 2000 to July 1, 2008. U.S. Census Bureau, Population Division, Table P14: SEX BY AGE FOR THE POPULATION UNDER 20 YEARS. Universe: Population under 20 years. 2010 Census Summary File 1.

* Complete state and county data profiles are available online at http://www.alavoices.org/ alabama_kids_count

Please note: Population sub-groups are listed and referred to the way the agency or organization providing the data references the sub-groups. Though you will see varying nomenclature used, the way we refer to population sub-groups throughout the 2020 Alabama Kids Count Data Book is intentional in order to be as accurate as possible in representing the data.

Visit the KIDS COUNT data center for access to hundreds of child wellbeing indicators at your fingertips to support smart decision making and good policies for children and families at datacenter.kidscount.org.

LIST OF INDICATORS

- Child Population (Under 20)
- Child Population by Age Range
- Children as a Percentage
 of County Population
- Diversity of Alabama's Child Population
- Pre-School Aged Children (Age 3)
- Pre-School Aged Children (Age 4)
- Total Population

DEFINITIONS

ADULT DIABETES

The estimated age-adjusted percentage of persons age 20 and older with diabetes, excluding gestational diabetes.

Source: https://www.cdc.gov/ diabetes/atlas/countydata/atlas. html

ADULT OBESITY

The estimated age-adjusted percentage of persons age 20 and older who are obese, wherein obesity is a Body Mass Index (BMI) greater than or equal to 30 kilograms per meters squared.

Adult Body Mass Index (BMI) < 18.5 is underweight; BMI 18.5 to <25 is normal; BMI 25.0 to <30 is overweight; BMI 30 or greater is obese¹.

Source: https://www.cdc.gov/ diabetes/atlas/countydata/atlas. html

BIRTHS TO FEMALES AGED 10-19

The number of live births to females aged 10 through 19 per 1,000 females in that age group.

Source: Special tabulations provided by the Alabama Department of Public Health, Center for Health Statistics.

BIRTHS TO TEENS AGED 15-17

The number of live births to females aged 15-17 per 1,000

females in that age group. This number includes only births where the age of the mother is known.

Source: Special tabulations provided by the Alabama Department of Public Health, Center for Health Statistics.

BIRTHS TO UNMARRIED FEMALES, AGED 10-19

The number of live births to unmarried females aged 10 through 19 expressed as a percentage of live births to women of all ages (includes only births where the age of the mother is known.

Source: Special tabulations provided by the Alabama Department of Public Health, Center for Health Statistics.

CHILDREN WITH SERIOUS EMOTIONAL DISTURBANCE (SED) RECEIVING MENTAL HEALTH SERVICES

A child or adolescent, age 18 vears or less with a mental health diagnosis who is either separated from family due to signs and symptoms resulting from the mental health diagnosis or is experiencing functional impairment in the community. family, school, or work. Also the child/adolescent is experiencing substantial impairment with autonomous functioning, is experiencing symptoms associated with psychotic disorder or suicidal/ homicidal ideation or gesture or is at risk of separation and in need of more restrictive treatment setting due to mental health diagnosis.

Source: Special tabulations provided by the Alabama Department of Mental Health.

CHILDREN WITHOUT HEALTH INSURANCE:

The number and percentage of children in the civilian noninstitutionalized population without health insurance.

Source: U.S. Census Bureau, 2014-2018 American Community Survey 5-Year Estimates, Table B27001, Health Insurance Coverage by Sex by Age.

DIET-RELATED DEATHS

The number of deaths related wholly or in part to diet-related causes per 100,000 population.

Source: Special tabulations provided by the Alabama Department of Public Health, Center for Health Statistics.

FEMALES RECEIVING ADEQUATE PRENATAL CARE

Percentage of births wherein prenatal care was begun by the fourth month of pregnancy and 80.0 percent or more of the recommended prenatal visits were made. The data reported herein represent the sum of the "adequate" and "adequate plus" categories of the Adequacy of Prenatal Care Index, which is comprised of the following categories:

1. Aequate-Plus Care: prenatal care begun by the fourth month

NOTE: 1 https://www.cdc.gov/healthyweight/assessing/bmi/adult_bmi/index.html#Why

LIST OF INDICATORS

and 110 percent or more of the recommended visits were made.

- 2. Adequate Care: prenatal care begun by the fourth month and 80-109 percent of the recommended visits were made.
- 3. Intermediate Care: prenatal care begun by the fourth month and 50-79 percent of the recommended visits were made.
- Inadequate Care: prenatal care that did not occur, began after the fourth month, or in which less than 50 percent of the recommended visits were made.

For more information see, M. Kotelchuck, "An Evaluation of the Kessner Adequacy of Prenatal Care Index and a Proposed Adequacy of Prenatal Care Utilization Index," American Journal of Public Health, 1994, 84[9]:1, 414-1,420.

Notes: (1) Variations in prenatal care percentages over the last few years may reflect in part changes in data collection methodology. Formerly, these data were collected directly from mothers at the time of birth. They are now collected by hospitals from healthcare providers. (2) No information was reported regarding the adequacy of prenatal care for 213 births in Russell County in 2013 (23.8 percent of all births) and 26 births in Sumter County (17.7 percent of all births).

Source: Alabama Department of Public Health, Center for Health Statistics, Selected Maternal and Child Health Statistics, 2003, Table 9 and Alabama Vital Statistics, 2015, Table 11 and Table 12. – we do not produce Selected Maternal and Child Health Statistics book in last few years. Table 9 contains almost same information as AVS table 12.

INFANT MORTALITY

The number of deaths of infants under one year of age per 1,000 live births.

Source: Alabama Department of Public Health, Center for Health Statistics.

LOW BIRTH WEIGHT

A weight at birth of less than 5.5 pounds or less than 2,500 grams. The percentage of births with low birth weight out of all births where the birth weight is known.

Source: Alabama Department of Public Health, Center for Health Statistics, *County Health Profiles* (2007, 2017).

MOTHERS WHO BREASTFED

The number of mothers who breastfed at birth, expressed as a percentage of all births (excluding those births for which the breastfeeding status was unknown).

Source: Alabama Department of Public Health, Center for Health Statistics.

MOTHERS WHO SMOKED DURING PREGNANCY

The number of mothers who smoked at any trimester during pregnancy, expressed as a

- Adult Diabetes
- Adult Obesity
- Births to Females, Aged 10-19
- Births to Teens, Aged 15-17
- Births to Unmarried Females, Aged 10-19
- Children with SED
 Receiving MH Services
- Children Without Health Insurance
- Diet-Related Deaths
- Females Receiving Adequate/ Adequate-Plus Prenatal Care
- Infant Mortality, All Races
- Low Birth Weight, All Races
- Mothers Who Breastfed
- Mothers Who Smoked
- Poor Mental Health Days
- Pre-term Births to All Mothers
- Ratio of Mental Health Providers to Population

DEFINITIONS

percentage of all births (excluding those births for which the smoking status was unknown).

Source: Alabama Department of Public Health, Center for Health Statistics.

POOR MENTAL HEALTH DAYS

Poor Mental Health Days measures the average number of mentally unhealthy days reported in past 30 days. This measure is based on responses to the Behavioral Risk Factor Surveillance System (BRFSS) question: "Thinking about your mental health, which includes stress, depression and problems with emotions, for how many days during the past 30 days was your mental health not good?" The value reported in the County Health Rankings is the average number of days a county's adult respondents report that their mental health was not good.

Source: Behavioral Risk Factor Surveillance System, https://www. cdc.gov/500cities/

PRE-TERM BIRTH

The percent of all live births that occurred at a gestational age of less than 37 weeks. This percent includes only births where the gestational age is known.

Source: Alabama Department of Public Health, Center for Health Statistics.

RATIO OF MENTAL HEALTH PROVIDERS TO POPULATION

Mental Health Providers is the ratio of the population to mental health providers. Mental health providers are defined as psychiatrists, psychologists, licensed clinical social workers, counselors, marriage and family therapists, and mental health providers that treat alcohol and other drug abuse, as well as advanced practice nurses specializing in mental health care. The ratio represents the number of individuals served by one mental health provider in a county, if the population were equally distributed across providers.

* Complete state and county data profiles are available online at http://www.alavoices.org/ alabama_kids_count

Please note: Population sub-groups are listed and referred to the way the agency or organization providing the data references the sub-groups. Though you will see varying nomenclature used, the way we refer to population sub-groups throughout the 2020 Alabama Kids Count Data Book is intentional in order to be as accurate as possible in representing the data. Visit the KIDS COUNT data center for access to hundreds of child wellbeing indicators at your fingertips to support smart decision making and good policies for children and families at datacenter.kidscount.org.

DEFINITIONS

AGE 0-3 RECEIVING EARLY INTERVENTION SERVICES

Number of children aged 0-3 receiving services through the Alabama Early Intervention System. This includes both children with developmental delays and children with diagnoses that increase the risk for developmental delays (e.g., cerebral palsy, spinal bifida, etc.). Data are reported for the fiscal year.

Source: Special tabulations provided by the Alabama Department of Rehabilitation Services, which is the lead agency for Alabama's Early Intervention System.

AVERAGE 11TH GRADE ACT SCORES

The average test scores on the English, mathematics, reading, and science components of the ACT and the composite scores for all four components for public school students enrolled in the 11th grade in 2018-2019. Scores can range from 1 (lowest) to 36 (highest) on each of these components and for the composite. The ACT is now administered to all 11th graders at no cost to the students.

Source: Special tabulations provided by the Alabama State Department of Education.

BIRTHS TO FEMALES WITH LESS THAN 12 YEARS OF EDUCATION

The number of live births to females with less than 12 years

of schooling, expressed as a percentage of all live births.

Source: Special tabulations provided by the Alabama Department of Public Health, Center for Health Statistics.

CHILD CARE FACILITIES

The number of licensed or exempt facilities located within a county as of April 2020. "Licensed facilities" are those that are licensed by the Alabama Department of Human Resources (DHR). This indicator encompasses family care homes (serving six children or less), group child care homes (serving 7-12 children) and licensed child care centers (serving more than 12 children). "Exempt child care centers" are faith-based programs/ schools that have submitted required documents to DHR and have received a letter of exemption.

Source: Special tabulations provided by the Alabama Department of Human Resources, Child Care Services Division.

CHILDREN PARTICIPATING IN FIRST CLASS PRE-K

The number of children (four years of age) participating in First Class Pre-K divided by the estimated number of all children of that age. First Class Pre-K classrooms are funded through Alabama's First Class Pre-K program, which uses a diverse delivery grant structure to create high-quality Pre-K classrooms in both public schools and private programs (such as child care and faith-based centers). The program meets each of the ten quality standards measured annually by the National Institute for Early Education Research (NIEER). First Class Pre-K providers coordinate with schools to facilitate children's successful transition into kindergarten. Each First Class Pre-K class typically serves 18 children.

Source: Special tabulations provided by the Alabama Department of Early Childhood Education.

CHRONIC ABSENTEEISM

Students who miss ten or more school days in a given school year for any reason – including excused or unexcused absences.

Source: Special tabulations provided by the Alabama State Department of Education.

COLLEGE AND CAREER READY INDEX

The number of enrolled students meeting at least at least one CCR benchmark expressed as a percentage of the number of enrolled students in the selected cohort. Data are reported for public schools only. Students are considered College and Career Ready by receiving any of the following benchmarks:

- \cdot A benchmark score on any section of the ACT exam
- A qualifying score on an Advanced Placement or International Baccalaureate exam

LIST OF INDICATORS

- An approved college or postsecondary credit while in high school
- · A benchmark level on the ACT Work Keys
- · An approved industrial credential
- Documented acceptance for enlistment into the military

Source: Special tabulations provided by the Alabama State Department of Education.

DIRECT CERTIFICATION

Under direct certification, states and districts can use information provided by Supplemental Nutrition Assistance Program (SNAP), Temporary Assistance for Needy Families (TANF), and Food Distribution Program on Indian Reservations (FDPIR) agencies to establish that a student is a member of a household participating in one of these programs and is thus automatically eligible to receive free meals. These children can therefore be certified to receive free meal benefits without the household having to submit an application. Certain foster care, migrant, runaway, and homeless children may also qualify in this way and become certified for free meals without submitting an application, based on documentation submitted to the district by an appropriate state or local agency. The eligibility of directly certified students is not subject to the verification process.

Lunch Program Direct Certification Improvement Study: Main Report https://fns-prod.azureedge.net/ sites/default/files/ops/NSLPDirect CertificationImprovement.pdf

EARLY HEAD START AND HEAD START CLASSROOMS

The number of Early Head Start/ Head Start classrooms in each county as of May 2020 for the 2019-2020 program year. Head Start grantees served a total of 16,119 children aged birth to five years in Early Head Start and Head Start classrooms.

Head Start and Early Head Start programs are federally funded programs, with no cost to families that are designed to promote family engagement as well as school readiness for children from low-income families. Early Head Start serves pregnant women and families with children under age 3. Head Start programs serve children between 3 and 5 years old. Program options available can include: center-based, home-based, migrant and seasonal, and family child care.

Source: Special tabulations provided by the Alabama Head Start Association and the Alabama Department of Early Childhood Education.

ENGLISH LANGUAGE LEARNERS

The number of languageminority students enrolled in grades K-12 that are limited in English proficiency, expressed as

- Age 0-3 Receiving Early Intervention Services
- Average 11th Grade ACT Scores
- Births to Females with Less Than 12 Years of Education
- Child Care Centers Capacities
- Child Care Facilities
- Children Participating in First Class Pre-K
- Chronic Absenteeism (10-17 Days)
- Chronic Absenteeism (18+Days)
- College and Career Ready Index
- Direct Certification
- Early Head Start and Head Start Classrooms
- English Language Learners
- Expulsions by Gender
- First Class Pre-K Classrooms by Type of Delivery
- First Grade Retention
- Graduation Rate
- High School Dropout Rate
- Homeless Students
- Ninth Grade Retention
- Per Pupil Expenditures
- Scantron Eighth Grade Math
- Scantron Eighth Grade Reading
- Scantron Fourth Grade Math
- Scantron Fourth Grade Reading
- Suspension by Gender
- Suspension by Race
- Teachers Teaching Out of Field

DEFINITIONS

a percentage of total enrollment. The determination of "English proficiency" is based on various assessment criteria and includes migrant children and youth.

Source: Special tabulations provided by the Alabama State Department of Education.

EXPULSION

This is an action authorized by the LEA whereby the student is usually removed from the school or system for an extended period of time. Only the local board of education may expel a student. In order to return to school, the student must follow the local board of education procedures. Expulsion does not mean moving a student from a regular program in one school to a regular program in another school.

Source: Special tabulations provided by the Alabama State Department of Education.

FIRST GRADE RETENTION

The number of students enrolled in the first grade during the specified school years who were not promoted to the second grade. This number is expressed as a percentage of all students enrolled in the first grade. Data are reported for public schools only.

Source: Special tabulations provided by the Alabama State Department of Education.

GRADUATION RATE

The 2018-2019 graduation rate counts any student who graduated at any time during their four year cohort. The number is expressed as a percentage of all students in the cohort.

Source: Special tabulations provided by the Alabama State Department of Education.

HIGH SCHOOL DROPOUT RATE

The percent of students in the 2018-2019 cohort who left school any time during their four year cohort (grades 9-12) and did not immediately enroll in another school. Data are reported for public schools only.

Source: Special tabulations provided by the Alabama State Department of Education.

HOMELESS STUDENTS

The number of students enrolled in grades K-12 identified as homeless at any point during the 2018-2019 school year. This number is expressed as a percentage of total enrollment. Students are considered homeless if they lack a fixed, regular and adequate residence. This indicator includes students who live in emergency shelters, transitional housing shelters, motels, hotels, vehicles, etc. Unlike the definition of homeless used by the Department of Housing and Urban Development, this indicator also includes children whose families

are "doubled up" (i.e., living with relatives, friends, etc.) because they cannot otherwise secure adequate housing.

Source: Special tabulations provided by the Alabama State Department of Education.

MATH AND READING SCORES (SCANTRON)

The percent of total public school students enrolled in grades 4 and 8 scoring at the "proficient level" (i.e., Levels 3 and 4 combined) on the ACT Aspire test in mathematics and reading. Level 3 and 4 scores are defined as those which meet or exceed benchmark scores for the specified subject and grade level. Students who exceed benchmark scores are considered on target for college readiness by the time they reach the 11th grade.

Source: Special tabulations provided by the Alabama State Department of Education.

NINTH GRADE RETENTION

The number of students enrolled in the ninth grade during the specified school years who were not promoted to the tenth grade. This number is expressed as a percentage of the total number of students enrolled in the ninth grade. Data reported are for public schools only.

Source: Special tabulations provided by the Alabama State Department of Education.

PER PUPIL EXPENDITURES

Public school revenue from all sources (federal, state and local) divided by the average number of students enrolled per day for the years specified.

Note: All dollar amounts are adjusted for inflation to reflect 2019 dollars.

Source: Special tabulations provided by the Alabama State Department of Education.

SUSPENSIONS

Suspended/Out of School: This includes instances in which a student is temporarily removed from his/her regular school for disciplinary purposes to another setting (e.g., home). It does not include suspension for less than one complete day, alternative school program, and/or reassignment to another education program or class where the student will receive instruction under the supervision of the local education agency.

Source: Special tabulations provided by the Alabama State Department of Education.

Suspension - In-School: This disposition is used in instances in which a student is temporarily removed from his/her regular classroom(s) for disciplinary purposes but remains under the direct supervision of school personnel. Direct supervision means school personnel are physically in the same location as students under their supervision.

Source: Special tabulations provided by the Alabama State Department of Education.

TEACHERS TEACHING OUT OF FIELD

An out-of-field teacher is a teacher who (1) holds a valid Alabama certificate and is assigned during the school day to teach in an area(s) for which he/she is not properly certified, or (2) does not hold any valid Alabama certificate and is assigned during the school day to teach in an area(s).

Safety Definitions & Sources

DEFINITIONS

CHILD DEATH RATE

The number of deaths from all causes to children aged 1-14 per 100,000 children in that age group.

Source: Special tabulations provided by the Alabama Department of Public Health, Center for Health Statistics.

CHILDREN ADOPTED

The number of children aged 0-17 whose adoptions were finalized during the years specified. Note: Data may include a minimal number of cases where the person was 18 years of age or older.

Source: Special tabulations provided by the Alabama Department of Human Resources, Family Services Division, Office of Data Analysis.

CHILDREN IN FOSTER CARE

The number of children under 20 years of age receiving foster care on March 31, for the years specified.

Source: Special tabulations provided by the Alabama Department of Human Resources, Family Services Division, Office of Data Analysis.

CHILDREN IN PROTECTIVE SERVICES

Number of children who are not in foster care and remain in the custody of their family or primary caretaker and for whom the Department offers services to maintain safety, stability and child well-being. Services are provided to the family unit. A family may request services, but most on-going cases follow an investigation of child abuse/neglect and services are needed to safely maintain the child with the family.

Source: Special tabulations provided by the Alabama Department of Human Resources, Family Services Division, Office of Data Analysis. Children with Indication of Abuse or Neglect: The number of children with indication of abuse or neglect per 1,000 children under 18. This measure involves instances of child abuse or neglect where both credible evidence and the professional judgment of the social worker substantiate that an alleged perpetrator is responsible for harming the child. Data reported are for the fiscal year.

Source: Special tabulations provided by the Alabama Department of Human Resources, Family Services Division, Office of Data Analysis.

CHILDREN WITH INDICATION OF ABUSE OR NEGLECT

The number of children with indication of abuse or neglect per 1,000 children under 18. This measure involves instances of child abuse or neglect where both credible evidence and the professional judgment of the social worker substantiate that an alleged perpetrator is responsible for harming the child. Data reported are for the fiscal year.

SOURCE: Special tabulations provided by the Alabama Department of Human Resources, Family Services Division, Office of Data Analysis.

ILP AGES 14 AND OLDER

The number of children (ages 14 to 20) that are approaching the age of emancipation from care and participate in specialized services to learn critical skills to live successfully as an adult. Examples of ILP services are: Independent living needs assessment, academic support, post-secondary educational support, career preparation, employment programs or vocational training, housing education and home management training, budget and financial management, health education and risk prevention, family support and healthy marriage education, mentoring, supervised independent living, room and board financial assistance, and education financial assistance.

Source: Special tabulations provided by the Alabama Department of Human Resources, Family Services Division, Office of Data Analysis.

JUVENILE COURT VIOLENT CRIME PETITION RATE

The number of juvenile court petitions filed for the commission of violent crimes, divided by the total population of youth aged 10 through 17, multiplied by 1,000.

Violent crimes include murder, rape (first and second degrees), robbery (first, second, and third degrees), assault (first and second degrees), domestic violence (first and second degrees, third degree pursuant to Section 13A-6-132(d), and by strangulation or suffocation pursuant to Section 13A-6-138), and other selected crimes listed in Section 12-25-32(15), Ala. Code 1975. For the purposes of this

LIST OF INDICATORS

report, a juvenile petition is a sworn, written document signed by a person 18 years of age or older who has knowledge of specific facts or is informed of facts alleging that a child is delinguent and believes that those facts are true. A petition gives the juvenile court jurisdiction once it is filed with the clerk of the court. A petition is only filed with the clerk of the court after an intake officer has determined that the juvenile court has subject matter jurisdiction, venue, probable cause and the filing of the petition is in the best interest of the public and/or the child. Allegations of a juvenile delinquency petition are treated by the same standards of sufficiency as a criminal complaint or indictment (i.e., it is a charging instrument placing the accused on due process notice of the nature of the pending charge against him or her).

Source: Special tabulations provided by the Alabama Administrative Office of Courts, Family Court Division; The Sentencing Commission's statute §12-25-32 for the purpose of defining a violent offense (section 15).

PREVENTABLE TEEN DEATH RATE

The number of deaths from homicide, suicide, and accidents to persons aged 15 through 19 per 100,000 persons in that age group.

Source: Special tabulations provided by the Alabama Department of Public Health, Center for Health Statistics.

TEENS NOT ATTENDING SCHOOL/NOT WORKING

The percent of youth aged 16-19 who are not enrolled in school and who

are unemployed or not in the labor force.

Note: Different methodologies were used in producing base year versus current-year data for this indicator; hence, caution should be used in making comparisons over these two time periods.

YOUTH INCARCERATIONS BEFORE AND AFTER THE ALABAMA JUVENILE JUSTICE ACT OF 2008

Status offenders as defined in Section 12-15-201(4), Ala. Code 1975, below, generally can no longer be detained in a secure detention effective 10/1/2009 as a result of The Alabama Juvenile Justice Act of 2008.

STATUS OFFENDER: A status offender is an individual who has been charged with or adjudicated for conduct that would not, pursuant to the law of the jurisdiction in which the offense was committed, be a crime if committed by an adult. ... Status offenses include, but are not limited to, the following: a. Truancy. b. Violations of municipal ordinances applicable only to children. c. Runaway. d. Beyond control. e. Consumption or possession of tobacco products. f. Possession and consumption of alcohol, which is a status offense by federal law, even though considered a delinquent act by state law. g. Driving under the influence

• Child Death Rate

Economic Security Definitions & Sources

DEFINITIONS

CHILDREN IN EXTREME POVERTY

The number of children under 18 living in households with an annual income that is less than 50.0 percent of the poverty threshold. This number is expressed as a percentage of all children under 18.

Source: Bureau of the Census, 2000 Census of Population and Housing, Census Bureau Website, www. census.gov, Summary File 3, Table PCT50, Released May, 2002; and U.S. Census Bureau, 2014-2018 American Community Survey 5-Year Estimates, Census Bureau Website, https://www.census.gov, Table B17024.

Note: Different methodologies were used in producing base year versus current-year data for this indicator; hence, caution should be used in making comparisons over these two time periods.

CHILDREN IN POVERTY

Children in the specified age range (i.e., under 5, 5-11, 12-17 and under 18) who live in households with annual incomes that are below the federal poverty threshold expressed as a percentage of all children in the specified age range.

Source: Bureau of the Census, 2000 Census of Population and Housing, Census Bureau Website, www.census.gov, Summary File 3, Tables PO87, P159A, P159B, and P159H, Released May, 2002; and U.S. Census Bureau, 2014-2018 American Community Survey, Census Bureau Website, https:// www.census.gov, Tables B17001, B17001A, B17001B, and B17001I.

CHILDREN RECEIVING CHILD CARE SUBSIDIES

The unduplicated count of children that are recipients of Child Care Development Funds.

Source: Alabama Department of Human Resources, Child Care Services Division, Office of Child Care Subsidy.

CHILDREN UNDER 18 IN SINGLE-PARENT FAMILIES

The percent of *own children* under 18 years of age who reside with only one parent. This number does not include children who live in households with a single relative or non-related person who is not the child's parent.

Source: U. S. Census Bureau, 2000 Census of Population, Census Bureau Website, www.census. gov, Summary File 1, Tables PO28, PO28A, PO28B, and PO28H. Released 2001; and U.S. Census Bureau, 2014-2018 American Community Survey 5-Year Estimates, Census Bureau Website, www.census.gov, Table B09005

EMPLOYED MOTHERS WITH YOUNG CHILDREN

The number and percent of mothers who are parents of children under age six and are employed or serving in the armed forces.

Data reported for 2000 represent a single year only and represent mothers who are 16 years or older. Data reported for 2014-2018 reflect a five-year average and represent mothers aged 20-64.

Note: Different methodologies were used in producing base year versus current-year data for this indicator; hence, caution should be used in making comparisons over these two time periods.

Source: U. S. Census Bureau, 2000 Census of Population, Census Bureau Website, www. census. gov, Summary File 3, Table P45, Released 2002; and U. S. Census Bureau, 2014-2018 American Community Survey, Census Bureau Website, www.census.gov, Table B23003, Released December, 2019.

FOOD INSECURITY

Food insecurity (all ages and children under 18) refers to the USDA's measure of lack of access, at times, to enough food for an active, healthy life for all household members and limited or uncertain availability of nutritionally adequate foods. Food insecurity may also reflect a household need to make tradeoffs between important basic needs, such as housing or medical bills, and purchasing nutritionally adequate foods. Food insecure households are not necessarily food insecure all the time.

Beginning in 2020, Feeding America enhanced the food insecurity model through the inclusion of a disability rate variable and refining the poverty measure to reflect nonundergraduate student poverty. Because of this methodology changes, the estimates from Map the Meal Gap 2020 are not

LIST OF INDICATORS

comparable to estimates from previous years.

Source: Feeding America, *Map the Meal Gap 2020, Food Insecurity and Child Food Insecurity Estimates at the County Level.*

MEDIAN HOUSEHOLD INCOME

MEDIAN HOUSEHOLD INCOME The point at which half of all households are above a specified income level and the other half are below that same level.

Incomes for 2008 and 2018 have been adjusted for inflation so that they are comparable with 2018 dollars. Caution should be exercised in comparing income data from model-based estimates (as reported herein for 2008 and 2018 between counties and over time (see Small Area Income and Poverty Estimates, General Cautions about Comparisons of Estimates, and Census Bureau Website at www.census.gov).

Table 1: 2008 Poverty and Median Income Estimates – Counties

Source: U.S. Census Bureau, Small Area Estimates Branch. Table S1903: MEDIAN INCOME IN THE PAST 12 MONTHS (IN 2018 INFLATION-ADJUSTED DOLLARS)

MEDICAID PAID BIRTHS

The number of births wherein Medicaid was the principal source of payment for the delivery. This number is expressed as a percentage of all births. Source: Special tabulations provided by the Alabama Department of Public Health, Center for Health Statistics.

PERSONS IN POVERTY

The number of persons living below the federal poverty threshold, expressed as a percentage of the total population.

Note: Different methodologies were used in producing base year versus current-year data for this indicator; hence, caution should be used in making comparisons over these two time periods.

SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM (SNAP) ELIGIBLE ALL AGES

Number of persons eligible for food assistance through the Supplemental Nutrition Assistance Program or "SNAP" (referred to as the "Food Assistance Program" in Alabama). Data excludes 68,271 persons aged 60+ who were eligible for food assistance through the Alabama Elderly Simplified Application Project (AESAP) in March 2020 and 52,812 persons in March 2015. Data reported are for March of the specified years.

DEFINITIONS

Source: Unpublished data provided by the Alabama Department of Human Resources, Food Assistance Division.

SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM (SNAP) ELIGIBLE CHILDREN UNDER 20

Number of persons/children under age 20 eligible for food assistance through the Supplemental Nutrition Assistance Program or "SNAP" (referred to as the "Food Assistance Program" in Alabama). Data reported are for March of the specified years.

Source: Unpublished data provided by the Alabama Department of Human Resources, Food Assistance Division.

SUPPLEMENTAL NUTRITION ASSISTANCE PROGRAM (SNAP) RECIPIENTS

Number of persons receiving food assistance through the Supplemental Nutrition Assistance Program or "SNAP" (referred to as the "Food Assistance Program" in Alabama). Data excludes 68,450 persons aged 60+ who received food assistance through the Alabama Elderly Simplified Application Project (AESAP) in March 2020 and 53,007 person in March 2015. Data reported are for March of the specified years.

Source: Unpublished data provided by the Alabama Department of Human Resources, Food Assistance Division.

UNEMPLOYMENT RATE

The number of persons unemployed, computed as a percentage of the number of persons employed, plus the number of persons looking for work expressed as an annual average for the years indicated. Data are reported for persons aged 16+.

VULNERABLE FAMILIES

Vulnerable families are those with first births to unmarried teenage mothers not finishing high school, expressed as a percentage of first births to women of all ages. This includes only births where the birth order is known.

Source: Special tabulations provided by the Alabama Department of Public Health, Center for Health Statistics.

WIC AVERAGE MONTHLY CASELOAD

The average monthly caseload of participants in the WIC Program during the 2019 fiscal year. WIC is a Special Supplemental Nutrition Program funded through the USDA that provides federal grants to states for supplemental foods, health care referrals and nutrition education for low-income pregnant, breastfeeding, and nonbreastfeeding postpartum women, and to infants and children up to age five who are found to be at nutritional risk. Source: Special tabulations provided by the Alabama Department of Public Health Center for Health Statistics.

* Complete state and county data profiles are available online at http://www.alavoices.org/ alabama_kids_count

Please note: Population sub-groups are listed and referred to the way the agency or organization providing the data references the sub-groups. Though you will see varying nomenclature used, the way we refer to population sub-groups throughout the 2020 Alabama Kids Count Data Book is intentional in order to be as accurate as possible in representing the data.

Visit the KIDS COUNT data center for access to hundreds of child wellbeing indicators at your fingertips to support smart decision making and good policies for children and families at datacenter.kidscount.org.

CAUTIONARY NOTES

All data are reported by county of residence except for the juvenile violent crime court petition rate¹ and children receiving child-care subsidies.²

SAMPLING AND SMALL POPULATIONS

Rates derived from small sample populations and/or from populations with few minority residents should be considered with caution because the margins of error can be quite high due to small sample sizes.

For instance:

 Several county-based rates and percentages reported for birth-related health indicators disaggregated by race³ were computed using a base of less than 50 births.

- In several Alabama counties, a population base of fewer than 1,000 people was used to compute birth rates for females aged 15-17 and 10-19 (including the rates that are disaggregated by race).⁴
- The population base used to compute rates of preventable teen deaths for several Alabama counties was less than 1,000.
- The Data Book disaggregates persons below the poverty level and children below the poverty level, as defined by the Census Bureau, by sample populations for race and ethnicity.

.

Additionally, rates and percentages based on small numbers are inherently not reliable.

ACCURACY

The information in this book is based on data reported to *Alabama Kids Count* by various Alabama agencies. These agencies sometimes depend, in turn, on other data collection entities. We make every effort to reproduce this information accurately, but we cannot guarantee the accuracy of the data supplied to us. Reporting and tabulation errors beyond our control may affect the validity of some of these data.

- ¹ Court petition rates for juvenile violent crime are tabulated according to the county where the petition was filed.
- 2 Children receiving child-care subsidies are tabulated according to the county where the services are received.
- ³ Including rates for infant mortality, lowweight births, births to unmarried teens and pre-term births.
- 4 Contact VOICES for Alabama's Children for a list of counties where teen birth rates are based on small populations.

METHODOLOGY

Overall county rankings are based on a scale containing nine indicators of child well-being: low-weight births, births to teens aged 15-17, children in poverty, fourth grade students scoring at Levels 3 and 4 in reading on the Scantron ACT test, children participating in first class Pre-K, teens not attending school and not working, child food insecurity, Medicaid paid births and the unemployment rate.

These nine indicators were selected based on their high degree of interrelationship and other factors. Based on data reported in the 2020 Alabama Kids Count Data Book, these nine are considered to be among the strongest indicators available for measuring child well-being.

The individual indicators were standardized in order to produce a common "metric" or "basis for measurement" across all nine items. For each variable, individual scores for each county were then summed in order to produce an overall scale score. The counties were subsequently ranked from "1" (best performance) to "67" (worst performance) based on their total scale score. Because all measures were given the same weight in calculating the overall score, no judgment was made regarding the relative importance of each of the individual indicators.

The indicators included in the overall ranking scale may vary somewhat from one year to the next. Therefore, caution should be exercised in comparing the composite county rankings presented in the current *Data Book* with those reported earlier.

Alabama's Population Centers

There are twelve Metropolitan Statistical Areas (MSA) in the state of Alabama. Data by MSA can help lawmakers identify areas of need near population centers.

A CLOSER LOOK AT MSAs IN ALABAMA

The United States Office of Management and Budget defines a metropolitan statistical area (MSA) as a region that contains a substantial population center with adjacent communities that have a high degree of economic and social integration with that center. Each MSA must have at least one urbanized area of 50,000 or more inhabitants.

Looking at data organized by MSA can help local leaders and state agencies identify areas of concern and prioritize areas of need. It must be noted, however, that the data in this section is for counties only. County level data cannot be totaled for MSAs.

| | Child Population (Under 20) | Children as a % of County Population | Infant Mortality Rate, All Races | High School Dropout Rate | Child Death Rate | Preventable Teen Death Rate | Children in Poverty |
